FROM THE WORLD'S LEADING MANUFACTURER OF DOUBLE ROLLER FABRIC

*All Vibe® Duple fabrics are cut with sealed edges
on the most advanced cutting table in the UK.*

TRADE BROCHURE

<https://vibefabrics.co.uk/vibeduple/>

All Vibe®Duple fabrics are cut with sealed edges on the most advanced cutting table in the UK.

**VIBE® DUPLÉ ONLY
USE A TIGHTLY
WOVEN MESH FOR
A SUPERIOR BLIND
FINISH**

Vibe®Duple double roller fabric is made up of translucent and opaque striped material layers, which glide past each other to create different light intensities and people cannot see in from outside. Align the stripes to create a 'day' or 'open' effect or align the stripes to create a 'night' or 'closed' effect.

Durable and Easy to Care for: The day and night blind is made from polyester fabric. The biggest advantage of polyester fabric is that it has good wrinkle resistance and shape retention, high strength and elastic recovery ability. The blind is cut by thermal cutting technology, so it will not be frayed after long-term use. This material is very easy to clean. Just wipe with dry cloth.

Effectively regulate the brightness of your room by adjusting the chain mechanism, two woven cloth stripes. Suitable for a range of rooms: Home, hotel, office, dining room, meeting room, study room, library etc. Offers view or privacy option whilst still controlling light and child safety accessories to protect your kids.

Fabric is very important. The mesh needs to be tightly woven to make a good blind, cheaper fabrics with a loose or wide mesh will always create problems due to cheap production and movement between the panels. Vibe®Duple is from the worlds best manufacturers and all weaves are tight. All are OEKO-TEX accredited.

Our Fabric Supplier Has Been Manufacturing This Type of Fabric Since 1999.

High quality Vibe®Duple double rollers - all from UK stock.
